

Dear Editor-in-Chief of the "Journal of Contemporary Brachytherapy":

On behalf of the authors of the paper "The use of nomograms in LDR-HDR prostate brachytherapy" published in your journal "Journal of Contemporary Brachytherapy" (2011/volume 3/number 3; pages: 121-124), we would like that you consider a correction in the text.

In page 123, column 1, line 4, where it is said:

"where SK is the source Air Kerma Strength ($\mu\text{Gy} \times \text{m}^2 \times \text{h}^{-1}$), T is total radiation time (h), D is the prescribed dose (Gy)".

We consider that to be consistent with the units that appear in figures 4 and 5, and the results in table 2, it should be said:

"where SK is the source Air Kerma Strength ($\mu\text{Gy} \times \text{m}^2 \times \text{h}^{-1}$), T is total radiation time (h), D is the prescribed dose (cGy)".
